

## **Weekly EPD Updates**

The American Angus Association is now running National Cattle Evaluation (NCE) EPD updates every week, rather than biannually. New EPDs come online every Friday morning at the AAA website. Non-parent animals with no data being submitted will see very little EPD change on a weekly basis. Sires that have progeny data being submitted or young animals that have performance data submitted will see larger changes. Our sale catalog was printed with the spring 2011 NCE EPDs, which went live 12-10-10. EPDs posted on this website are current as of this spring 2011 NCE. Visit <http://www.angus.org/Animal/EpdPedSearch.aspx> for the latest available EPDs.
